Statement of intent for Music

Our vision is: Learning Together, Growing Together

It's not important who does the planting, or who does the watering. What's important is that God makes the seed grow. The one who plants and the one who waters work together with the same purpose. And both will be rewarded for their own hard work." 1 Corinthians 3:7-8

At Hawkchurch C of E Primary School, we endeavour to inspire all children to be independent, resilient and motivated in their learning, taking pride in all they do. We teach all children to be reflective practitioners who are able to handle difficulty and change with a growth mindset as they gain knowledge of the wider world in our small, rural community.

Intention

Intention The National Curriculum for music aims to ensure that all pupils:

- Perform, listen to, review and evaluate music
- Be taught to sing, create and compose music
- Understand and explore how music is created, produced and communicated.

At Hawkchurch C of E Primary, the intention is that children gain a firm understanding of what music is through listening, singing, playing, evaluating, analysing, and composing across a wide variety of historical periods, styles, traditions, and musical genres.

Our objective at Hawkchurch is to develop a curiosity for the subject, as well as an understanding and acceptance of the validity and importance of all types of music, and an unbiased respect for the role that music may wish to be expressed in any person's life. We are committed to ensuring children understand the value and importance of music in the wider community, and are able to use their musical skills, knowledge, and experiences to involve themselves in music, in a variety of different contexts.

Implementation

The Music curriculum ensures students sing, listen, play, perform and evaluate. This is embedded in the classroom activities as well as the weekly singing assemblies, various concerts and performances, the learning of instruments.

The elements of music are taught in the classroom lessons so that children are able to use some of the language of music to dissect it, and understand how it is made, played, appreciated and analysed.

In the classroom, students learn how to play instruments. In doing so, they understand the different principle of each method of creating notes, as well as how to read basic music notation. They also given opportunities to compose which in turn feeds their understanding when listening, playing, or analysing music. Composing or performing using body percussion and vocal sounds is also part of the curriculum, which develops the understanding of musical elements without the added complexity of an instrument.

Impact

Whilst in school, children have access to a varied programme, which allows students to discover areas of strength, as well as areas they might like to improve upon. The integral nature of music and the learner creates an enormously rich palette from which a student may access fundamental abilities such as: achievement, self-confidence, interaction with and awareness of others, and self -reflection. Music will also develop an understanding of culture and history, both in relation to students individually, as well as ethnicities from across the world. Children are able to enjoy music, in as many ways as they choose- either as listener, creator or performer. They can dissect music and comprehend its parts. They can sing and feel a pulse. They have an understanding of how to further develop skills less known to them, should they develop an interest in their lives.
